

What is Mop'N'Dry?

MOP'N'DRY is a powerful and fast drying detergent specially formulated to be used together with microfibre mops and spray and glide mops. It breaks down greasy and stubborn stains to quickly dry without leaving any residual films on floors, making it excellent for spot cleaning high traffic floors.

Key Benefits

- ✓ MOP'N'DRY makes spot cleaning floors quick and easy
- ✓ Fast drying to minimise OH&S risks
- ✓ Quickly breaks down greasy and stubborn soil
- ✓ Biodegradable and phosphate free
- ✓ Reduces the need to clean floors when only spots or sections are dirty

How Does It Work?

Simply spray onto floors and mop over with a microfibre mop. Its quick dry ability makes it excellent for improving safety and reducing OH&S risks. Suitable for all types of floors, the perfumed detergent is concentrated to boost value and minimise packaging and transport.

For Use On...

MOP'N'DRY will remove all typical soil and spillages including foodstuffs, drinks, cooking oil and general traffic dirt from all types of hard floors.

MOP'N'DRY is concentrated for cost-effective cleaning and leaves a fresh scent. No rinsing is required.

Technical Data

Properties

COLOUR – Transparent red liquid
 ODOUR – Fresh fragrance
 pH = 10.0 – 11.0
 FOAM – Low to moderate
 SHELF LIFE = 2 Years

Environmental Care

MOP'N'DRY is a new-generation cleaning liquid formulated to provide effective cleaning power over many different usages with minimum impact on the environment. MOP'N'DRY is biodegradable, phosphate-free and gentle on floors.

Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of product that are identified by colour and number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
MOP'N'DRY	Pink	1	All purpose and floor cleaners

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Spray and Glide Mops and Spray Bottles:

- Dilute to 1 in 10 with water into the canister of a spray and glide mop or directly into a spray bottle.
- Spray the solution onto the spot you are wanting to clean and mop over with the microfibre mop.

Mop Buckets:

- Dilute to 1 in 10 with water into the microfibre mop bucket.
- Dip the mop into the solution, wring it out, and then spread evenly over the floor being sure to cover all required areas. During this process, the floor should just be made damp and over-wetting should be avoided.

The Chemistry of Cleaning™

MOP'N'DRY

Detergent for microfibre mops

Disposal Information

1. Used solutions -

Used Solutions of MOP'N'DRY should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. MOP'N'DRY containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 1L, 5L, 20L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
