

## What is Wildflower?

WILDFLOWER is a commercial-grade disinfectant that kills bacteria and leaves surfaces clean and perfumed with a sophisticated floral fragrance.

### Key Benefits

- ✓ Dual action to remove unwanted odours – it cleans away the soilage and kills bacteria that generate bad odours and it reodourises the air.
- ✓ Non-Dangerous Good.
- ✓ Concentrate that saves on freight costs and reduces energy usage.

### How Does It Work?

WILDFLOWER is formulated with ingredients to attack and disperse dirt and grease, kill germs and destroy odours. It contains a popular fragrance to create a pleasant perfume in the room where it has been used.

### For Use On...

WILDFLOWER is designed for cleaning and disinfecting all washable hard surfaces, including floors, walls, sinks, baths, toilets, tiled areas and fittings.

WILDFLOWER may also be used as an air-freshener.

## Technical Data

### Properties

COLOUR – Transparent green liquid

ODOUR – Fine, floral perfume

pH = 5.5 – 6.5

FOAM – High level of foam with good stability

DISINFECTANT POWER – Commercial Grade Disinfectant at 1 in 50 dilution

ACTIVE INGREDIENT – Benzalkonium Chloride 2.75% m/v

### Microbiological Testing

WILDFLOWER has passed the TGA test for Commercial Grade Disinfectants (Option C) at a dilution of 1 in 50 against Escherichia coli and Staphylococcus aureus.

### Environmental Care

WILDFLOWER conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. WILDFLOWER is non-flammable and phosphate-free. It contains no solvents. All surfactants in WILDFLOWER are biodegradable. WILDFLOWER containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

## Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of product that are identified by colour and number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
WILDFLOWER	Light Green	3	Disinfectant and Antibacterial Detergents

## Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

## Application

WILDFLOWER is not for use on therapeutic devices.

### Commercial Grade Disinfection:

- Dilute to 1 in 50 parts with water. This is 200ml per 10L wringer bucket of water
- Apply this solution to the surface and wipe or scrub clean. Rinse with water or leave surface damp.

### Air Freshener:

- Dilute to 1 in 10 parts with water.
- Spray high into the room with a hand spraygun.
- Do not mix WILDFLOWER with soap, detergents or other chemicals. This may deactivate this disinfectant action.

Make a fresh solution each day and discard unused solutions at the end of each day. Observe the Use by Date printed on the label. Rotate stock properly so older product is used before new stock.

## Disposal Information

### 1. Used solutions -

Used Solutions of WILDFLOWER should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

### 2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

### 3. Empty packaging

#### Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. WILDFLOWER containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

#### Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 20L

## Dispensing Accessories:

Colour-coded 500ml Spray Bottle – Code D03

Trigger for 500ml Bottle Plain, Blue/White – Code DTR

Hand Pump for 5L Bottle (30ml/Stroke) – Code DHP30

Hand Pump for 20L Drum (30ml/stroke) – Code DHP20

Tap in Cap 5L – Code DTC5

Tap in Cap 20L – Code DTC20

20L Drum Tap – Code DTAP

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
